

Brodie House

I would like to take this opportunity to welcome you and your child to Brodie House. Our house is a fabulous smaller community within our school in which all of the students look out for each other and support each other. It is my great pleasure to care for the students within our house and I take tremendous pride in all that they achieve.

Our house is one of five houses in the school; Brodie, Roscoe, Aspinall, Walker and Wilkinson. The house system allows great opportunities for students to celebrate their successes together.

Throughout the year, students can gain house points through positive work, homework, participation in competitions, attendance and many extracurricular activities (see list below).

<u>REASON FOR POINTS AWARD</u>	<u>REWARD</u>
Excellent piece of classwork/homework	2 points
Contribution around school (for example helping collect litter outside)	2 points
Citizenship point (helping other students within school)	2 points
External point (issued for noteworthy task completed outside of school). For example volunteering with a youth group.	2 points
Sporting participation (representation) St Hilda's / House in a sporting event)	2 points
Sporting achievement (winning as part of a team or as an individual)	2 points
Participation in school / Form group participation	2 points
Attendance Reward 100% weekly attendance	5 points
Monthly attendance award 95% or above attendance per month	5 points

Students are then able to cash them in for a range of rewards. These rewards increase in size with points achieved.

For those of you who are new to Brodie House might not know much about this inspirational man so I have included a short write up about his life and the fantastic things he achieved.

John Alexander Brodie began his professional career in 1875 working in Liverpool Mersey Docks as a Civil Engineer. Brodie served as the president of the Institution of Civil Engineers and was the first local authority engineer to receive the accolade. Throughout his career, he accomplished many great things from the suggestion for the first ring road in the UK, which was here in Liverpool. To his personal favourite, the invention of the goal net which is still used in football today. However, we cannot forget Brodie's greatest engineering achievement, The Mersey Tunnel. At the time of its construction, it was the world's largest underwater road tunnel, a title held for 24 years. John Brodie should inspire all of our pupils at St Hilda's to strive for greatness and work hard to achieve their dreams.

I wish all students in Brodie House the best of luck for this academic year. Stay positive, work hard and make it happen!

Our form captains who represent our house are;

08BA

Ayran Navahan - Esmaelii
Kesia Robby

08BB

Oscar Saxlund
Benjamin Morris

09BW

Jude O'Hara
Elle Frith

10BW

Sophie Little-Byrne
Brad Stewart

11BB

House Captain: Isabelle Macaulay
Vice Captain: Lucy McLoughlin

Year 7 will have the opportunity to take this role this academic year.
