

**UK Electronics
Skills Foundation**

Girls into Electronics

A one-day course at a leading UK university - a unique opportunity for female students (aged 15-18) to develop their interest in Electronics

What's included in the Girls into Electronics course?

- Find out more about Electronics and studying Electronics at university
- Experience a sample lecture, a department tour and the opportunity to meet current students
- Participate in a practical session - an introduction to microcontrollers, using a Grove Beginners' Kit, including Arduino (yours to keep afterwards)
- Hear from female graduate engineers working in the Electronics sector

I'd just like to thank everybody involved in this course. I honestly would have never thought of Electronics as something that I could do without this'

**Girls into Electronics
course attendee, 2021**

One of the courses available this year:
University of Liverpool – Wed 20th July 2022

Attendance of this course is kindly sponsored by CSA Catapult

CATAPULT
Compound Semiconductor Applications
