

WHAT SKILLS WILL I LEARN IN THIS SUBJECT?

Analytical thinking
evaluating causes of crime and interpreting complex information

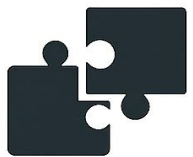

Critical evaluation
assessing theories, justice processes and real-world criminal cases

Ethical awareness
understanding moral, legal and social responsibilities in justice contexts

Communication
presenting clear, evidence-based arguments in reports and discussions

Problem-solving
forming reasoned conclusions and arguments

"Criminology develops your ability to **investigate, analyse and evaluate crime and justice**, helping you **understand behaviour, evidence and the impact of law and social control**. It builds the **analytical, ethical and research skills** valued by **universities, policing and public sector employers**.
